# DETWILER INCIDENT

CA-MMU-014474

### **INCIDENT ACTION PLAN**

### **OPERATIONAL PERIOD**

7/24/2017 0700

to

7/25/2017 0700

### **INCIDENT OBJECTIVES (ICS 202)**

IIIOIDE	IN OBOLOTIV	LO (100 A			
1. Incident Name:	2. Operational Period:	Date From:	7/24/2017	Date To:	7/25/2017
DETWILER		Time From:	0700	Time To:	0700
3. Objective(s):					
Management Objectives					
-Provide for and maintain public and first respon	der safety by utilizing the ind	cident safety ana	lysis process.		
-Be fiscally responsible for all management and	suppression actions.				
-All management actions and efforts will be focu	sed on serving, safeguardin	g, and protecting	the citizens,	cultural and h	istorical
resources of Mariposa and Tuolumne Counties.	,				
-Ensure timely notifications as evacuations occu	r and that the repopulation p	olan is carried ou	t in an efficier	nt and organiz	ed manner.
-Stay committed to interagency coordination and	d collaboration through hone	st and transpare	nt communica	ation.	ά.
Control Objectives					
-Keep the fire East of Merced County					
-Keep the fire South of Greeley Hill Road					
-Keep the fire West of Highway 140 and Highwa	y 49				
-Keep the fire North of Road 600					
*					
General Situational Awareness:		s = 0			
-MAINTAIN L.C.E.S. AT ALL TIMES. Safety zon	ies and escape routes are m	nandatory.			
-Ensure all personnel maintain situational aware	eness.				
-Rolling material and steep terrain. Remember to	o maintain good footing.				
-Keep your hydration up by drinking water and e	electrolyte beverages. Avoid	energy drinks.			
-Maintain good communications with your super	visors, adjacent forces and	crew members.			
-Maintain awareness of fire weakened trees, asl	n pits, and burned-out stump	holes.			
5. Site Safety Plan Required?	Yes □ No Ø

### **Fire Weather Forecast**

FORECAST NO: 6 NAME OF FIRE: Detwiler

PREDICTION FOR: Monday UNIT: Madera-Mariposa-Merced SHIFT DATE: July 24, 2017 Incident Meteorologist: Tom Wright (240-778-5304) FORECAST ISSUED: 1900, July 23, 2017

**DISCUSSION:** Sunny and dry weather continues Monday, but it won't be quite as hot. Isolated thunderstorms are expected to the east of the fire over the Sierra Nevada in the afternoon. These storms are <u>not</u> expected to move near the fire, but gusty outflow winds from the east are possible over the fire during the afternoon and evening. Otherwise, the wind regime will be slope driven through much of the day with the usual west-northwest winds over exposed areas.

### MONDAY:

- WEATHER: Mostly sunny. Thunderstorm buildups visible to the east of the fire.
- WIND (20 FT): Mid-slope and below: downslope 1-3 mph through 1000, then becoming upslope 2-6 mph. On the ridges and exposed areas: west-southwest 3-6 mph through 1400 hrs, then west-northwest 4-8 mph with gusts to 12 mph. Gusty east outflow winds possible afternoon and evening.
- MAX TEMPERATURES: 98-102
- MIN RH: 18-22%
- CHANCE RAIN: 0% LAL: 1
- INVERSION: Mid-slope, breaking by 1000 hrs.
- MIXING HEIGHT: Near mid-slope in the morning, then rising to 7500 ft after 1000 hrs.
- TRANSPORT WINDS: Light and variable through 1000 hrs then becoming south-southwest 5-10 mph.

### **MONDAY NIGHT:**

- WEATHER: Mostly clear.
- WIND (20 FT): Becoming downslope 1-3 mph after 2200. Above the inversion: Northeast around 5 mph.
- MIN TEMPERATURES: 62 Valleys to 68 Ridges
- MAX RH: 30-35% Ridges to 40-50% Valleys
- CHANCE RAIN: 0% LAL: 1
- INVERSION: Mid-slope developing after 2200

### **TUESDAY:**

- WEATHER: Mostly sunny. Thunderstorm buildups visible to the east of the fire.
- WIND (20 FT): Mid-slope and below: downslope 1-3 mph through 1000, then becoming upslope 2-6 mph. On the ridges and exposed areas: west-southwest 3-6 mph through 1400 hrs, then west-northwest 4-8 mph with gusts to 12 mph. Gusty east outflow winds possible afternoon and evening.
- MAX TEMPERATURES: 94-98
- MIN RH: 20-25%
- CHANCE RAIN: 0% LAL: 1
- INVERSION: Mid-slope, breaking by 1000 hrs.
- MIXING HEIGHT: Near mid-slope in the morning, then rising to 6000 ft after 1000 hrs.
- TRANSPORT WINDS: Light and variable through 1000 hrs then becoming southwest 5-10 mph.

### 3-5 Day Planning Outlook:

Wednesday: Clear. Lows 60-66. Max RH: 45-55%. Highs: 94-98. Min RH: 20-25%. Winds: WNW 4-8 mph. Clear. Lows 66-72. Max RH: 35-45%. Highs: 98-103. Min RH: 17-20%. Winds: WNW 5-10 mph. Clear. Lows 68-74. Max RH: 30-40%. Highs 100-105. Min RH: 15-18%. Winds WNW 5-10 mph.

### **QR Codes to Fire Weather Calculator App**

(for taking weather observations)

- Fill out all fields, tap calculate, then send/share observation
- Please email kml and csv to detwilerobs@gmail.com
- No signal? The app stores the obs for you and will queue them up for transmission when you have a signal

Android

### FIRE BEHAVIOR FORECAST

FORECAST NUMBER:	6	TYPE OF FIRE:	WILDFIRE

FIRE NAME: DETWILER OPERATIONAL PERIOD: JULY 23, 2017 24 HR

DATE ISSUED: JULY 22, 2017 TIME ISSUED: 1900

### **INPUTS**

### **WEATHER SUMMARY:**

A LITTLE COOLER THROUGH THE OPERATIONAL PERIOD. SLIGHT CHANCE OF THUNDERSTORM OUTFLOW FROM STORMS ON THE SIERRA CREST. SEE INCIDENT METEOROLOGIST FORECAST.

### **OUTPUTS**

### FIRE BEHAVIOR

### **GENERAL:**

NFDRS-ENERGY RELEASE COMPONENT =82 (AVERAGE), BURNING INDEX 118, HUNDRED HOUR FUEL MOISTURE 6%, TEN HOUR FUEL MOISTURE 4%, 1 HOUR FUEL MOISTURE 2-3%, PROBABILITY OF IGNITION 80-100 DURING DAYLIGHT HOURS. GRASS FUELS IN SUNLIGHT ARE VERY RECEPTIVE TO IGNITION.

### SPECIFIC:

### BRANCH I, III, V, AND VI

NO MOVEMENT ANTICIPATED. HIGH SPOTTING POTENTIAL EXISTS DUE TO HEAVY GRASS FUELS AND HIGH PROBABILITY OF IGNITION. UNBURNED CANOPY WITH DEAD BRANCHES COULD HARBOR FIREBRANDS.

### **BRANCH II**

CONTAINMENT LINES ARE IN BUT UNBURNED OR SCORCHED ISLANDS OF CHAMISE COULD REBURN WITH HIGH INTENSITY IF AN IGNITION OCCURS IN FULL ALIGNMENT WITH SUN, WIND AND SLOPE. DUST DEVILS CAN ALSO CAUSE SMOLDERING FUELS TO FLAME.

### **BRANCH IV**

THESE ARE THE HEAVIEST FUELS ON THE FIRE BUT HIGHER ELEVATION MEANS HIGHER LIVE FUEL MOISTURES. MEASURED AT TELEGRAPH HILL 3400' ELEVATION, CHAMISE = 74% (CRITICAL IS 60%), MANZANITA = 94% (CRITICAL IS 80%).

### **BRANCH VII**

A PROPERLY LOCATED THRUNDER STORM IN THE UPPER MERCED WATERSHED COULD COLLAPSE SENDING STRONG WINDS DOWN THE MERCED RIVER DRAINAGE.

AIR OPERATIONS: SUNRISE 0600, SUNSET 2017. NO VISIBILITY ISSUES ANTICIPATED.

### SAFETY

USE THIS QR CODE TO VIEW THE TREE MORTALITY MAP FOR MARIPOSA COUNTY. THESE TREES HAVE BEEN DEAD FOR TWO YEARS OR MORE AND ARE READY TO FALL OR SPREAD SPOTFIRES ACROSS YOUR LINES. http://www.fire.ca.gov/treetaskforce/downloads/maps/TreeMortality\_RBP\_M MU.pdfhttp://www.fire.ca.gov/treetaskforce/downloads/maps/TreeMortality\_R BP MMU.pdf

THUNDERSTORMS IMPLY STRONG GUSTY WINDS IN MANY DIRECTIONS SIMULTANEOUSLY.
 HAVE A WEATHER WATCH AND OBSERVE THE SIGNS: VIRGA CLOUDS, THUNDER HEARD,
 LIGHTNING SEEN, DROPS FELT.

### **SNAGS**

### TREES ARE DROUGHT STRESSED, BEATLE IMPACTED AND FIRE DAMAGED Watch Out

- Ground cover has burned loosening the stability of the root system
- Some of the fire area is within the tree mortality area
- · Large oak trees are drought stressed

### Mitigation

- Remove the hazard if safe to do so
- Flag and report the hazard to personnel
- Be alert while working and driving in hazard area

### **GENERAL ILLNESS**

### FATIGUE, HOT WEATHER, HARD EXHAUSTIVE WORK PUTS US AT RISK

### **Watch Out**

- Hot weather causes dehydration, heat exhaustion and serious medical emergencies
- Hard exhaustive work increases core temperature, weakens the body's ability to function healthy and causes fatigue
- Fatigue Causes poor judgement and decreased work performance affecting safety

### Mitigation

- Proper nutrition, rest and hydration reduces fatigue and exhaustion emergencies
- Drink plenty of water and eat right- START EARLY reduce caffeine input
- Take breaks throughout the work-period and take measures to cool down

### **TOPOGRAPHY**

### **TOUGH COUNTRY TO WORK IN!**

### **Watch Out**

- Steep slopes may cause rolling material hazards
- This terrain will cause quick, unexpected upslope fire behavior
- Significant slip hazard exists throughout the incident

### <u>Mitigation</u>

- Post lookouts and monitor changes in fire behavior
- Watch out in areas with steep slopes, watch your footing and drive appropriately
- Listen for rolling rocks and boulders and 'yell out' to others around you

JACK PICCININI

INCIDENT SAFETY OFFICER

# SAFETY COMMUNICATION DETWILER INCIDENT

### THUNDERSTORM SAFETY

Approaching thunderstorms from the east may be noted by a sudden reverse in wind direction, a noticeable rise in wind speed, and a sharp drop in temperature. Rain, hail, and lightning occur only in the mature stage of a thunderstorm.

### Situation Awareness:

Fire is working its way East following the N. Fork of the Merced River following a diurnal wind pattern. Out flows from possible thunderstorms east over the Sierra's may cause a pronounced increase in fire behavior and sudden change in direction following major drainages.

**Observe the 30/30 rule:** If you see lightning and hear the thunderclaps follow in less than 30 seconds, take the storm precautions identified below. Do not resume work in exposed areas until 30 minutes after storm activity has passed.

### **Hazard Control:**

- Take shelter in a vehicle or building if possible.
- If outdoors, find a low spot away from tall trees, wire fences, utility lines and other
  elevated conductive objects. Make sure the place you pick is not subject to
  flooding.
- If in the woods, move to an area with shorter trees.
- If only isolated trees are nearby, keep your distance twice the tree height.
- If in open country, crouch low, with feet together, minimizing contact with the ground. You can use a pack to sit on, but never lay on the ground.
- If you feel your skin tingle or your hair stand on end, immediately crouch low to the ground. Make yourself the smallest possible target and minimize your contact with the ground.
- Don't group together.
- Don't stay on ridge tops, in wide open areas, or near ledges or rock outcroppings.
- Don't operate landline telephones, machinery, or electric motors.
- Don't handle flammable materials in open containers or metal hand tools.

### EMERGENCY FREQUENCY: CALCOORD

### LINE EMERGENCY:

Trauma Level I
U.C Davis Med Center-

**Burn Facility** 

Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.

- Division/Group Supervisor contacts:
  - Closest EMS resource
  - Communications Unit
- Communications Unit contacts:
  - 1. Ground or Air ambulance as requested
  - 2. Operations
  - Safety
  - 4. Medical Unit (916) 622-3371
- Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel.
  - A pre-assigned tactical frequency (i.e. CALCOORD) should be used for IWI and only for duration of need.

2823 Fresno St. Fresno

2315 Stockton Blvd. Sacramento

 Communications Unit will clear command channel for emergency traffic as needed and only for duration of need.

### INCIDENT BASE EMERGENCY:

**ICS 206** 

Contact Communications on CALCOORD with patient complaint/symptoms and location. Communications will respond appropriate medical response.

- Communication contacts:
  - 1. Medical Unit
  - Safety
  - 3. Logistics
  - 4. Operations
  - 5. Crew Supervisor
  - Comps/Ĉlaims

# DETWILER INFORMATION

844-668-3473 / 844-MMU-FIRE

Media Line 562-619-7467

### **MEDIA**

<u>California State Penal Code Section 409.5(d)</u> allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering the locations specified within the code, even if the area presents a danger to them. Media members should be advised of the nature of possible danger. Members of the media do not have the right to access crime scenes or any area where their presence may interfere with incident operations, mitigation or evidence collection.

- The media may only access private property with the property owner's permission. Fire personnel
  cannot provide members of the media with authorization to enter private property.
- If approached and questioned by the media and/or the public, talk about your assignment or task at hand. If need be, direct the questioning party to the incident PIO.
- Do not speculate or give opinions
- There is no such thing as an "off the record" comment.

### CAL FIRE SOCIAL MEDIA POLICY (Social Media 0691)

Social Media is increasingly being used by public agencies and the media as well as the public. This form of communication continues to grow rapidly in order to supply the public's desire for instant information gratification. All personnel assigned to a CAL FIRE incident will adhere to the CAL FIRE Social Media Policy. Further information about the CAL FIRE Social Media Policy can be obtained from the Information Officer. If you are uncertain, please ask. **Do not post**:

- Inappropriate information, pictures or videos
- Opinions regarding the incident or policy
- Endorsements of any kind

### PICTURES AND VIDEO OF INCIDENT

We are in a new era of media. Media no longer means the news/broadcast industry but now refers to anyone that has the capability to shoot video and or photographs and post them onto social media in a matter of minutes. Unfortunately we have seen some instances of video or photographs that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could have unwanted effects. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera can't be looking up, down and all around.

### **LOST AND FOUND**

The Information staff will manage *Lost and Found* items for the incident. If you have lost an item, leave your contact information and what you have lost at the Information trailer. If you have found an item on the incident, bring the item to the Information trailer.

### **MAIL SERVICE**

The Information staff will assist you in receiving letters and packages.

Mailing address for Detwiler Fire personnel to have mail sent to:

(Persons Name, O-Number)

C/O Detwiler Fire Incident Merced County Fairgrounds Public Information Trailer 900 Martin Luther King Way Merced, CA 95341

- RESOURCES MUST CHECK-IN PRIOR TO THE DEMOB PROCESS.
- TO BE DEEMED EXCESS, SUPERVISORS MUST SUBMIT AN ICS #213 TO THE RESOURCES UNIT.
- RESOURCES REPORT TO DEMOB AT THE TIMES POSTED ON THE TENTATIVE DEMOB LIST, WHICH IS POSTED AROUND THE INCIDENT BASE, AND ON THE QR CODE.
- PRIOR TO REPORTING TO DEMOB, PLEASE RETURN ALL SUPPLIES AND EQUIPMENT.
- RESOURCES WILL GET SIGNATURES FROM THE FOLLOWING UNITS:
  - GROUND SUPPORT (ALL RENTAL VEHICLES WILL BE INSPECTED)
  - o TIME
  - o TRAINING (IF THEY HAVE A TRAINEE)

RETURN TO DEMOB WITH YOUR ICS 221
THE REMAINING UNITS WILL BE SIGNED OUT VIA RADIO.

- MOTELS
- o SUPPLY
- COMMUNICATIONS
- DOCUMENTATION

### "Detwiller" CAMMU 014474 Incident Fireline Suppression Repair Plan

#### I. Objectives

The objective of the Suppression Repair Plan is to mitigate possible adverse effects to resources resulting from fire suppression activities on the Detwiller Fire, in a manner which does not compromise firefighter safety. The mitigations described within this plan have been developed to apply to constructed fire lines, watercourse crossings, access roads, drop points, heli-spots and any other locations disturbed by fire suppression activities. A Repair Specialist will be assigned to ensure that work is done as required and according to the Emergency Fire Suppression Repair Plan. Additional specialists or equipment may be used if the need arises. Specialists will release equipment from the area when their work is completed.

#### II. General Repair Guidelines

#### A. Helispots/Staging Areas/Safety Zones

- 1) Re-contour to the original slope as requested by the Repair Specialist.
- 2) Remove soil, and/or breach berms so that runoff can be dissipated. Cross drain these areas to effectively dissipate water runoff.
- 3) Place disturbed vegetation, brush and trees, piled during line construction, on the surface of safety zones and open areas. This may be done with equipment or hand crews.

#### B. Roads

- 1) Repair roads to pre-fire condition as requested by the Repair Specialist.
- 2) Re-establish existing berms where applicable.
- 3) Breach berms to facilitate drainage, where applicable.
- 4) Clean culverts plugged with soil and rock resulting from fire road use.
- 5) Remove all slash and debris from culvert inlets/outlets.
- 6) Blading or grading of roads may be necessary. Grading shall be done after all suppression repair work is completed for areas accessed by the roads being graded.
- 7) Where vegetative material was cut and deposited adjacent to permanent roads it shall be lopped and scattered to a depth within 30" of the soil surface.

#### C. Firelines; Hand and Dozer

Install waterbars as described in the guidelines below. Waterbars are designed to intercept, slow and spread the precipitation run-off in order to reduce sediment transport and soil erosion. The idea is to move water off the fireline before it can build up enough energy to erode and transport sediment. Re-establish waterbars and rolling dips using pre-fire locations. Flatten berms along fire lines to match natural contours. Utilize cut vegetation for erosion control on steep dozer and hand lines.

#### Waterbar Guidelines:

 Spacing: These spacing distances should be used as a guide. Judgment should be used in locating waterbars to minimize erosion potential. It may not be possible or necessary to place waterbars in steep or rocky areas. Install water-bars at the following recommended *minimum* intervals:

Fire line Gradient (% slope)	Minimum Distance Between Water-Bars (feet)
0 to 10	200
11 to 25	100
25+	50

- 2) Location: Locate waterbars at natural slope breaks or to take advantage of natural features when possible. Direct water to unburned areas, and/or resistant surfaces with high vegetation cover when possible. Waterbars should extend beyond the width of the trail and discharge into undisturbed areas, rocky ground, or filter areas well protected with slash and vegetative cover.
- 3) Depth and Width: Waterbars need to be cut into the ground surface; do not simply push up soil. On dozer constructed line waterbar depths should be at least 6 inches; total height from bottom of ditch to

top of waterbar should average at least 12 inches and not exceed 24 inches. On hand constructed line waterbar depths should be at least 4 inches; total height from bottom of ditch to top of water-bar should average at least 8 inches and not exceed 18 inches. The width of the waterbar channel should be enough to handle expected water flows and to avoid plugging when a normal amount of sloughing occurs.

4) Angle: Determine the average gradient in percent slope of the fire line being waterbarred. Add 5 to the average gradient. This approximates the angle in degrees for the water bar. Do not install water bars at an angle steeper than 45 degrees as this will increase water velocity rather than slow it down.

#### D. Watercourses

- 1) Watercourse crossings shall be dipped to original configuration. Waterbreaks shall be installed on each side of channel to divert flow off of trails prior to entering watercourse channel.
- 2) Remove all soil and debris that was placed in any stream channel. A Repair Specialist will review the site for acceptability. If all foreign material cannot be removed with heavy equipment, the material shall be removed by hand. The approaches to the crossing shall be sloped back to prevent future stream bank failure.

#### E. Archaeological or Historic Sites (if discovered)

- 1) All sites and potential sites shall be flagged and avoided.
- 2) Impacted sites will be reported to the Suppression Repair Specialist as soon as possible.
- If sites are encroached upon, work will stop immediately and the Division/Group Supervisor or Suppression Repair Specialist will be notified.

#### F. Other Repair Concerns

- 1) Remove all trash from fire lines and other affected areas.
- 2) Repair, broken, damaged fences, and/or gates damaged as the result of the fire control operations will be repaired. (Note: Extent and condition of damage should be documented prior to repairs.)
- 3) Grade and water roads, as needed, that were used during fire control operations. Roads should be outsloped with rolling dips where degradation of the road prism has resulted from fire control operations.

## TRAINING MESSAGE

Training Specialist Now located at Merced Fair Grounds inside of Sierra Hall next to Check-In. All Federal, State, and Local Government agency trainees working on position task books need to register with the training specialist in order to receive proper credit for your assignment. Bring your task book with you.

# TOPIC: WRITING EFFECTIVE PERFORMANCE EVALUATIONS

If you do not check in with the Training Specialist before Demob you will not be able to get credit for this incident. Please take a few minutes to come by and see the Training Specialist A.S.A.P.

Jonathan White (562) 324-1811
